

T series – the all-rounder

Practical details and intelligent construction for every requirement

T series

The junction boxes of the T series are true all-rounders: It is the practical details and intelligent construction that make the T series junction boxes so versatile.

The junction boxes are available in seven different sizes: T25, T40, T60, T100, T160, T250 and T350.

Protection rating of up to IP66, depending on the cover

IP55	T40					
IP65	T25					
IP66	T60	T100	T160	T250	T350	

Material T25–T100 PP polypropylene
T160–T350 PP / GF polypropylene / fibre-glass-reinforced

The benefits overview

Efficient mounting

- Labelling of the dimensions of the drill holes on the underside of the junction boxes
- Alignment markings (in the form of triangles) for easy side alignment
- Cable entry directly from the appropriate mounting substrate through break-out openings in the base
- Soft, replaceable plug-in seals
- Fastening elements available for easy mounting of the T60 or T100 on cable support or mesh cable tray systems
- Fastening also possible in the corner domes from the T60

This makes the T series junction boxes real all-rounders

- Nylon thread as cover captivity
- Rotary locks for safe and quick cover fastening from T60 and higher
- Sealable cover possible from T60
- Cover with labelling panels
- Halogen-free
- Also available in a flame-resistant version
- UV-stabilised

Versatile accessories

- Available with 5-pin terminal strip
- T100 also available with 2 or optionally 4 IP20 sockets in pure white
